

IT Support Portfolio

Pravin Omondi

Entry-Level IT Support / IT Operations (L1–L2)

Nairobi | Open to Hybrid & Remote

Professional Summary

I provide reliable first- and second-level IT support by diagnosing issues, restoring access, maintaining systems, and supporting users with clear communication. My focus is reducing downtime and removing technical friction so teams can work efficiently.

Core Skills

- End-user technical support (L1–L2)
- Hardware & software troubleshooting (Windows)
- Account setup, onboarding & offboarding
- Browser, extensions, proxy/VPN configuration
- Document workflows (PDFs, formatting, file management)
- Cloud tools (Google Drive, Docs)
- Clear user communication & follow-up

Tools & Technologies

- Operating Systems: Windows
- Productivity: Microsoft Word, Google Docs, Google Drive
- Browsers: Google Chrome (advanced configuration)
- Support Concepts: Ticket handling, escalation awareness
- Utilities: PDF tools, image-to-document conversion

Portfolio Projects

End-User Technical Support & Issue Resolution

Diagnosed and resolved login failures, browser misconfigurations, extension conflicts, and document access issues. Restored system usability and improved turnaround time.

System Setup, Configuration & Access Management

Installed and configured required software, browser environments, email, and cloud access. Prepared systems for immediate productivity with reduced setup errors.

Workflow Optimization & Self-Support Documentation

Standardized recurring workflows and documented repeatable steps to reduce errors, improve consistency, and speed up task execution.

Work Style & Strengths

- Calm and structured under pressure

- Self-starting and resourceful
- Clear communicator with non-technical users
- Strong ownership from issue to resolution

Target Roles

Entry-level IT Officer, IT Support, Helpdesk, or Internal IT Operations roles that value reliability, structure, and accountability.
